

January 2019

CIB Co-Sponsored Conference
SBE 2019 Brussels, Belgium
BAMB-CIRCPATH

SBE19Brussels - BAMB-CIRCPATH

BAMB
BUILDINGS AS MATERIAL BANKS

**BUILDINGS AS
MATERIAL BANKS**
a pathway for a circular future

INDUSTRY DAY | SITE VISIT | RESEARCH DAYS
5 February 2019 | 6 February 2019 | 6-7 February 2019

www.bamb2020.eu #BAMBimpact

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 642384

The Horizon 2020 EU-funded project BAMB – Buildings as Material Banks - brings 15 partners from 7 European countries throughout Europe together for one mission: Enabling a systemic shift in the building sector by creating circular solutions.

Since the end of 2015, BAMB has been developing and integrating tools that will enable the shift to a circular built environment: Reversible Building Design tools and Materials Passports – supported by new business models, policy suggestions, management and decision-making models. In addition to testing the developed BAMB tools, the environmental and economic benefits of circular buildings have been investigated through six real-life pilot projects.

The BAMB Consortium invites you to participate in the 3 days of the BAMB-CIRCPATH event.

This event has three activities (not overlapping):

- The 5th of February will be an industry day during which the Consortium will show the results of the project through interactive sessions. This day will be an opportunity for all stakeholders of the construction sector to learn more about what BAMB has achieved, provide feedback, exchange views on what is next and share the steps achieved on the

pathway towards a circular future. Have a look to the draft agenda and proceed to our free registration here: <https://www.bamb2020.eu/final-event/industry-day/>

- A site visit to the BAMB pilot Circular Retrofit Lab, that investigates and demonstrates how Reversible Building Design can prevent demolition waste when refurbishing existing buildings will be made during the morning of the 6th of February. Proceed to our free visit registration here: <https://www.bamb2020.eu/final-event/site-visit/>
- An international conference part of the worldwide prestigious SBE19 Conference Series for researchers and industry experts to exchange their ideas and research and showcase advanced innovative technologies and methodologies for the built environment will occur on the 6th of February (afternoon) and the 7th February 2019. More information and registration here: <https://www.bamb2020.eu/final-event/research-days/>

Conference Topics (among others):

- Strategies and tools for the design of reversible and transformable buildings and systems;
- Design for high reuse potential of buildings and building elements;
- Design for reuse of existing buildings, products and equipment;
- Environmental and economic impacts of reversible and transformable buildings and products;
- Efficient waste, resource and facilities management in the building sector;
- Cradle to cradle strategies and materials health;
- Innovative business models around circularity of resources in the construction sector;
- Case studies.
