We want to announce the publishing of the Conference Proceedings that is related to the SBE Conference – BAMB-CIRCPATH that has been held on 5-7 February 2019 in Brussels, Belgium.

This was an initiative of the Consortium of the H2020 BAMB Project together with the Sustainable Built Environment (SBE) series of conferences.

Being within the SBE series, this event gathered the support of CIB – International Council for Research and Innovation in Building and Construction, iiSBE – International Initiative for a Sustainable Built Environment, the United Nations Environment Programme, and FIDIC – International Federation of Consulting Engineers.

BAMB is a EU funded project that brings together 16 partners from 7 European countries throughout Europe together for one mission - enabling a systemic shift in the building sector by creating circular solutions. BAMB has been developing and integrating tools that will enable the shift to a circular built environment: Reversible Building Design tools and Materials Passports – supported by new business models, policy suggestions, management, and decision-making models.

In addition to testing developed BAMB tools, design, manufacturing, and construction innovations as well as the environmental and economic benefits of circular buildings have also been investigated through six real-life pilot projects.

The Proceedings are available for free and downloadable via [this link](#) and will also be available via ICONDA and the SBE website in the near future.

All qualified papers are published in collaboration with IOP Publishers as open access papers in electronic proceedings form within IOP Conference Series Earth and Environmental Science and are indexed in ISI (Web of Science) and Scopus.

**SBE Conference Series**

This Conference is part of the SBE Series of 2018-2020. More information of this series is to be found [here](#).
